

Perfect choice for

# Damasteel® Kitchen knives

**A Chef's knife is the single most important tool in any kitchen, and is used in the creation of virtually every dish. A sharp knife means more control and less slippage when you cut, leading to safer, more consistent slices. Plus, cutting with a sharp knife is just more fun!**

Quality made knives are not only rewarding to use but can provide a lifetime of inspiration. If you love the way your knife looks and that pulls you into the kitchen, it's totally worth it to find (and probably pay a little extra for) a knife that makes your heart skip a beat when you see it.

” I pride myself in sourcing the best materials I can find that excel in functionality and aesthetics. Damasteel is a unique product that caters to all knifemakers through usability, range of patterns, custom billet sizes, high hardness and most of all for me stainless properties. Damasteel is a pleasure to use, I feel comfortable aligning myself with a strong brand that is innovative and progressive across the board.
